TAKE CARE OF BABY.

Poor Ventilation System Will Deform as Quickly as Accident.

A great doctor once remarked that bad Nentilation deforms more children and detrovs more health than accident or plague. Raby should never be put to sleep in bed Baby should never be put to sleep in bed or perambulator with the head under the bed clothing, to inhale the air aiready breathed and further contaminated by exhalations from the skin. "You are smothering the life out of your child's lungs," an anxious mother was told not long ago. "How would you like to drink the water you wash in? Well, when you cover your laby's head up, you force him to use air that is just as bad and just as impure."

Never frighten your little ones into obecience with foolish threats. Many a timid, shrinking and cowardly man has to thank the experience of his nursery days for this tiefect in his constitution. It is wicked and shrinking and cowardly man has to thank
the experience of his nursery days for this
tiefect in his constitution. It is wicked and
cruel to tell a child that if he is naughty
the black man will take him away, or
something equally terrifying, as foolish
nurses and careless mothers have learnt
to their cost. Small wonder if the child
whose susceptible mind has been tainted
with stories of the supernatural, grows up
a helpless, cowardly specimen of humanity,
untit to fight the battle of life.
"When a baby screams at night," says an
authority on the subject, "you may be sure
that one of three things is the matter with
him—a pain, a pin or a passion. If it is the
former, put a teaspoonful of lime in a little
milk, and give it to him; then hunt for the
pim. But if he has been sufficiently and
properly fed at his usual meal time, don't
be troubled about his being hungry. Put
down the howling to natural or inherited
or acquired habit, and get through the
night as best you can."
